PROFESSIONAL EXPERIENCE

TEGENCE

Product Manager (AI & Technical)

Abuja

February 2025 -Present

- Led product discovery and delivery across multiple AI-driven products in HR Tech, Energy, E-commerce, and Hospitality.
- Owned the product design and delivery of an AI agent to support Landmark Africa's CSR operations, streamlining workflows and improving information access.
- Worked closely with engineers to translate business problems into system requirements, user flows, and technical scopes.
- Drove product execution of an AI risk prediction system for solar installations, contributing to frontend development to present risk insights in a user-friendly interface.

SABI

Product Manager

Victoria Island, Lagos

April 2024 - July 2025

- Analyzed user feedback and data to inform product development decisions and prioritize features
- Led product execution of an AI risk prediction system for solar installations, contributing to frontend development to present risk insights in a user-friendly interface.
- Managed sprints using ClickUp, Notion and Azure DevOps, tracking development tickets to ensure timely delivery of product features, improving cross-team coordination and sprint efficiency.
- Led the development of an internal Human Resource product, eliminating rigid frictions and improving operational processes
- Handled the management of AI products and automation applications within the internal organization

NSIA INSURANCE

System and Database Administrator

Victoria Island, Lagos

January 2023 – February 2024

- Orchestrated the successful development and implementation of the Claims Payment Module, significantly enhancing claims payment efficiency and improving customer experience.
- Collaborated with end-users to troubleshoot and resolve database-related inquiries, increasing user satisfaction.
- Identified and resolved performance bottlenecks, increasing claims processing and payout efficiency by 30%

Communication, Problem-Solving, Critical Thinking, Adaptability, Team Collaboration, Attention to Detail

EDUCATION

REDEEMER'S UNIVERSITY

Bachelor of Science in Computer Science

Second Class Upper (GPA: 3.47/4.0)

Ede, Osun State, Nigeria

September 2018 - October 2022

PROJECTS

The New Breed Church Management System

Built a full-stack production using React TS and FastAPI (SQLAlchemy as ORM) to solve frictional & broken processes in The New Breed Church:

- Built a production Church Management System with FastAPI and PostgreSQL, featuring member management, attendance tracking, role-based access control (RBAC), and email broadcasts, deployed on Render.
- Implemented QR-based worker attendance with geolocation checks and automated attendance reporting.
- Built worker attendance tracking using QR-code based check-ins with geolocation validation to prevent remote or fraudulent check-ins.
